

We'll make your IT work for you...

FWCS Group Network Audit Fact Sheet

Behind Every Successful Company Is A Successful IT Infrastructure

The **FWCS Group Network Audit** is a comprehensive examination of your entire IT infrastructure: from the reliability of your backups, hardware utilisation and software licensing, to internet connectivity and legal compliance.

Each audit provides you with a plain English breakdown of the inherent strengths and weaknesses of your network, a thorough analysis of any security risks, and detailed recommendations for the future development of your information systems.

After the audit, we will invite you into our offices to discuss our findings.

The **FWCS Group Network Audit** is a personalised solution designed to give you complete understanding of your IT systems and peace of mind. For many companies, a Network Audit is the first step to defining and delivering a strategic IT vision for their enterprise.

Benefits

1. Allows you to see how secure your infrastructure actually is from internal and external threats
2. Allows you to see how much storage space you have left
3. Allows you to see how effective your existing suppliers are
4. Identifies threats and weaknesses that could cause critical downtime
5. Allows you to make informed decisions based on factual analysis

About Us

At FWCS, our philosophy is simple: the buck stops with us. We take responsibility for all your systems.

- We speak to all your IT suppliers so you don't have to.
- We make sure everything works together.
- Integrated systems means everything runs smoothly, letting you focus on doing more business.
- We never lose sight of your bottom line, so we get the best prices for you from a wide range of suppliers.
- We keep you updated on the latest technologies, to make sure your business is always benefiting from great products that can save you time and money.
- And we never recommend or supply anything we haven't tried and tested ourselves.
